ABOUT ME

In September I will begin my master's degree in data science at Copenhagen Business School, after having completed my bachelor's degree in Global Business Informatics and taken a gap year, during which I have gained relevant work experience and travelled a lot.
As a person, I am outgoing, approachable and a quick learner. I have played basketball at a high level for many years, so I know what it is like to be part of a team and to work towards a common goal. I spend a lot of my free time doing martial arts and watching films and can therefore often be found at the local gym and the local cinema.
